

The Aryan Struggle...

There are still some people who don't believe there is a race problem all over the world. They accept their governments with complete faith. This should suffice to prove their error, for seldom, if ever, is complete confidence an indicator of real politics, but more often a subjective expression of psychological conditioning and institutional dictates.

These naive few blame those who address the issue as racists. Moreover, these credulous, dependent, and conformist creatures label Aryan political activists as "bigots". So fearful of White Power are they, that they make perfect subjects, which no doubt the liberal elite rewards them with a degree of security and subsistence existence.

Is subsistence existence worth living? Apparently, nature does not think so. Nature has revolted against race-mixing and misuse of the environment. Nature has produced a sickly population, and its famed bounty has repeatedly failed to appear. If the smug followers of the liberal establishment would dare to venture off their beaten paths, they would soon be reduced to the primitive state based on fight or flight.

Nor are racialists a new phenomenon. They can cite traditions, facts and precedents dating from the founding of church and state. Considering the evidence, it seems these "bigots" may in fact be valid political activists, deserving every political right they find so hard to maintain. Thus, all so-called liberals should examine their own blatant intolerance.

If whites could speak out, they would tell thousands of stories of exploitation, intimidation and political repression. Yet, the few traitors permitted to editorialize via the media are made to appear as the majority, trendsetters and heroes.
